# TOWN WARRANT

---

## THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Hancock in the County of Hillsborough in said State, qualified to vote in Town Affairs:

You are hereby notified to meet at the Town Hall in said Hancock on Tuesday, the sixth day of March, next at ten of the clock in the forenoon, to act upon the following subjects:

1. To choose all necessary Town Officers for the year ensuing; and, upon approval by the voters at that time, to postpone consideration of the balance of the Warrant until Saturday, the Tenth day of March next at 1:00 p.m. in the afternoon.

2. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriations of the same.

3. To see if the Town will raise and appropriate (five hundred dollars) \$500 for the use of the Town History Committee, or take any other action relating thereto.

4. To see if the Town will raise and appropriate (one thousand dollars) \$1,000 for the Water Reserve Fund, or take any other action relating thereto.

5. To see if the Town will raise and appropriate (nine-hundred ninety-three dollars and four cents) \$993.04 to be supplemented by (six-thousand six-hundred twenty dollars and twenty-five cents) \$6,620.25 from the State for the Town Road Aid program for this year, the combined sums to be used to pay the outstanding note for the two-year program voted last year, or take any other action relating thereto.

6. To see if the Town will raise and appropriate (three hundred sixty-four dollars) \$364 to support the mental health service program of the Monadnock Family and Mental Health Service, or take any other action relating thereto.

7. To see if the Town of Hancock, New Hampshire will raise and appropriate the sum of (one thousand thirty dollars) \$1,030 to support the services of the Monadnock Community Visiting Nurse Association, Inc. This local request for financial support is based on a \$1.00 per capita formula.

8. To see if the Town will raise and appropriate (nine-thousand five-hundred one dollars and seventy-one cents) \$9,501.71 for the Contoocook Valley School District to cover the Town's share of an overpayment on the part of Peterborough as a result of a mistake in pupil count in the nine towns of the District, or take any other action relating thereto.

9. To see if the Town will authorize the Selectmen to borrow up to (fifteen thousand dollars) \$15,000 to be repaid over a three-year period to purchase a new dump truck for the Highway Department, or take any other action relating thereto.

10. To see if the Town will appropriate from the principal and interest in the Fire Hose Reserve Fund a sum not to exceed (twelve hundred dollars) \$1,200 to purchase new fire hose for the Fire Department, or take any other action relating thereto.

11. To see if the Town will raise and appropriate (one hundred dollars) \$100 for the Fire Hose Reserve Fund, or take any other action relating thereto.

12. To see if the Town will raise and appropriate a sum not to exceed (fifteen hundred dollars) \$1,500 which, together with money donated by the Fire Department members, will be matched by Civilian Defense money for the purchase of a new warning system to replace the present siren at the Fire Station, or take any other action relating thereto.

13. To see if the Town will raise and appropriate (one thousand dollars) \$1,000 to re-shingle the roof of the Fire Station, or take any other action relating thereto.

14. To see if the Town will raise and appropriate (fifteen hundred dollars) \$1,500 for capital improvements to the Library building, or take any other action relating thereto.

15. To see if the Town will authorize the Moderator to appoint a committee to work with the Library Trustees to study ways of gaining additional space for the library and to make a report of their conclusions to the 1974 Town Meeting, and to raise and appropriate (five hundred dollars) \$500 for the use of this committee, or take any other action relating thereto.

16. To see if the Town will accept Sunset Lane as a Town Road; the southerly half to be kept closed subject to gates and bars, and the present water line to remain the responsibility of the present property owners including any maintenance or replacement thereof, or take any other action relating thereto.

17. To see if the Town will raise and appropriate (seven thousand dollars) \$7,000 to start to implement the recommendations

of the Dump Study Committee to establish a sanitary landfill operation for the Town, or take any other action relating thereto.

18. To see if the Town will vote to accept Sugarbush Road and Sugarbush Park in the Davis Pasture Development on Prospect Hill when the Selectmen determine that the provisions of the Hancock Subdivision Ordinance have been met, or take any other action relating thereto.

19. To see if the Town will raise and appropriate (five hundred dollars) \$500 for the Conservation Commission, or take any other action relating thereto, this sum to be allowed to accumulate from year to year or to be expended by the Commission or to be added to by gifts of money.

20. To see if the Town will raise and appropriate (five hundred seventy-five dollars) \$575 to re-roof the old blacksmith shop next to the hockey rink and to fertilize and lime the recreation field or take any other action relating thereto.

21. To see if the Town will authorize the Selectmen to borrow a sum not to exceed (ten thousand dollars) \$10,000 which would be matched by Federal Funds to build two new tennis courts at a total cost of \$20,000, or take any other action relating thereto. (Five thousand dollars) \$5,000 of this principal to be borrowed would be paid by the Recreation Committee over the term of the note.

22. To see if the Town will petition the Governor to restore prayers, Bible Reading and hymns in the Hancock School, in the classrooms, on a voluntary basis, or take any other action relating thereto.

23. To see if the Town will authorize the Selectmen to appoint a committee, in coordination with study committees from other towns, to study the feasibility of a town manager type of government for three or more towns, and to report thereon at the 1974 Town Meeting, or take any other action relating thereto.

24. To see if the Town will vote to raise and appropriate the sum of (seven hundred dollars and forty cents) \$700.40 as the Town's share for the studies and operation of the Southwestern New Hampshire Regional Planning Commission, or take any other action relating thereto.

25. To see if the Town will vote to authorize the Board of Selectmen to acquire the Jean E. King Property on the shore of Norway Pond to be used by the Town of Hancock for recreational purposes, said acquisition to be by negotiation, purchase, and/or eminent domain, and that the sum of (seven thousand dollars) \$7,000 be raised and appropriated to pay for the cost of the same, or take any other action relating thereto.

26. To see if the Town will vote to designate as a scenic Road, under provisions of RSA 253:17, the road stretching between Route 123, and Route 137; known as Currier Road, Fairfield Road and Old Hancock Road, going in a Northerly direction from Route 123; also, the branch off this road that enters onto Route 123 near the Harvey Smith residence, or take any other action relating thereto.

27. To see if the Town will vote to authorize the Selectmen to borrow money in anticipation of taxes, or take any other action relating thereto.

28. To see if the Town will accept gifts and legacies left in trust for the Town, or take any other action relating thereto.

29. To hear the reports of auditors and committees heretofore chosen, or take any other action relating thereto.

30. To transact any other business that may legally come before said meeting.

Given under our hands and seal, this ninth day of February, in the year of our Lord nineteen hundred and seventy-three.

William S. Rockhill

Ernest A. Adams

Richard E. Amidon

## REPORT OF THE POLICE DEPARTMENT

The year 1972 saw more police services put to use for the town. This in part due to the arrival in March of the new cruiser, a published police telephone number and the people becoming used to a full time police department. There were 643 calls relating to police business. The following matters were attended to:

- 12 Medical assistance calls
- 23 Motor vehicle accidents reported; 21 investigated by police
- 7 House breaks reported and investigated
- 19 Civil and domestic calls handled
- 80 Summonses and arrests made
- 2 Burglary arrests
- 1 Narcotic arrest
- 1 Bigamy arrest
- 2 Arrests for Driving while intoxicated
- 1 Arrest for using a motor vehicle without authority
- 1 Arrest for operating to endanger
- 76 Motor vehicle complaints
- 1 Fatality

I would like to thank the people of Hancock for the continued cooperation the police have received throughout the year. Officers Curtis O'Dell and Arthur Nickerson have done an excellent job in assisting me and taking over when I had occasion to be absent from town. Last but not least I would like to thank Scorpion New England for the use of a snowmobile for the winter. It is of great use in checking vacant property and emergency work.

Respectfully submitted,  
Bruce E. Skinner, Chief

**HANCOCK POLICE DEPARTMENT FINANCIAL REPORT**  
**Year ending December 31, 1972**

Amount on hand January 1, 1972	-0-
Received from Town on budget	\$14,000.00

Expenditures:	
Cruiser expenses	\$465.85
Cruiser insurance	283.00
Equipment & supplies	1,308.78
Gasoline	389.40
Salary	9,690.00

REPORT OF THE  
CONSERVATION COMMISSION FOR THE YEAR  
ENDING DECEMBER 31, 1972

Under the auspices of the Conservation Commission the annual can and bottle pick-up was conducted in the spring. 107 children and adults in 16 trucks traveled an aggregate of 30 miles and picked up an indeterminate tonnage of rubbish. We look forward to the day when a concerned public will leave nothing on the roadside for us to pick up. With your help this dream can come true.

The Commission has acquired from the estate of Ned M. Morningstar an acreage of wet land situated at the junction of Routes 202 and 137.

Otis H. Wilder Sr. has offered to the Commission a parcel of wet land in the Cranberry Bog area and contiguous to land now held by the Commission. We expect to receive a deed of this property early in 1973.

An application has been made to the Ford Foundation for funds to be used in a soil survey in which the Commission and the Planning Board are jointly interested.

Clearing of deciduous trees from the shore of Juggernaut Pond is proceeding under the supervision of the Commission.

The difficult job of surveying our Cranberry Bog property is now almost completed.

The Commission's maps of Hancock are still available at the Post Office and the Library for fifty cents each. Pocket size maps are free for the asking at Wilder's Garage.

## REPORT OF THE SEXTON — 1972

After a very damp spring, which made it almost impossible to work out of doors, we were able to get all the cemeteries in quite good shape for Memorial Day, and they were kept that way the rest of the summer.

We had to purchase two new power mowers and a few other tools this year.

Half the markers in the new Hillside Cemetery were placed, and we hope to complete this job during the coming summer.

The sexton has one suggestion which would help keep our cemeteries looking well. That is to request those who do not now have perpetual care for their family lots do so, if possible. Gone are the days of finding people, young or old, willing to work for a dollar an hour. We will have to pay two or three dollars an hour, at least, for good workers.

I would like to say a word of thanks to all those who helped in 1972.

Howard S. Rogers, Sexton

## HANCOCK TOWN LIBRARY

### Circulation and Use Record, 1972

Adult fiction loaned	7,204
Adult non-fiction loaned	2,748
Periodicals	752
Children's books loaned	4,439

---

15,143

Also during the year 420 records were circulated.

The State Library Bookmobile visited the library three times during the year to leave us a total of 1,564 books. In addition, we borrowed 75 books from the State Library at Concord on special requests.

As in the past our grade school children have visited the library with their teachers in some instances each week and other grades every two weeks during the school season, and some of our high school students continue to make use of our reference material.

Through the kindness of the Peterborough Library we received from the Wadleigh Memorial Library in Milford a gift of 17 large type books to add to our collection of these sight-saving books for the use of our patrons.

### *Book Inventory*

	<i>Adult</i>	<i>Junior</i>	<i>Total</i>
Number of books, Jan. 1, 1972	9,271	2,496	11,767
Purchased during the year	265	175	440
Gifts during the year	218	16	234
<hr/>			
Total volumes	9,754	2,687	12,441
Volumes discarded in 1972	13	108	121
Magazines currently subscribed to	24	5	29
Newspapers currently subscribed to	2		2

A very successful sale of old fiction, non-fiction and children's books was held on the lawn in front of the library on Old Home Day and the sum of \$136.00 was collected. This amount was used for the purchase of new books for adults and children.

Elsie Frank  
Librarian

## LIBRARY TRUSTEES REPORT

A world of books for young and old lies right in the heart of the village. Figures recently released by the State Library show how much we in Hancock appreciate our town library. We rank tenth in circulation among towns with a population of less than 2,000.

National Library Week in April was celebrated with a Sunday afternoon Open House honoring Dr. Richard Eustis on his retirement from twelve years as a trustee. Many friends and library personnel from surrounding towns expressed their appreciation of his dedicated, devoted service.

The selectmen have appointed Mr. Edward Wells to fill his unexpired term.

Beginning in June, Friday evening hours have increased a half hour, making the library open from 7-9 p.m. to conform to State Library policy. Evening hours are proving a welcome extra service.

Tuesday morning story hour at the beach was again a popular summer program with Doris Rogers, Assistant Librarian, and Frances Russ reading to different age groups between swimming lessons. Doris has also read to the children of the Hancock Pre-School who have come regularly to the library. She continues the traditional story time for grades one and two at the school library each Friday afternoon, reading selections from the public library collection.

To keep pace with the increased use of the library and projected growth of the town the trustees have given a great deal of time and study to plans for increasing shelf space and providing a much-needed quiet study area. Given a building lot of only 57 x 80 feet, a partly unfinished cellar with very low headroom, and an unheated area filled with massive stones, there are many problems to consider. The time is soon coming for a capital outlay for expansion and/or renovation.

To provide more efficient use of space a new double face free standing book case has been projected for the adult reading room. Hopefully this will be in place by the time you read this, as well as new shelves for the paperback books in the stack area. We are most grateful for the loyal volunteers who built them.

One August morning the trustees and the librarians had a work bee in the attic, sorting out the accumulation of years. Mr. and Mrs. Bertram Manning purchased many items of antique value. We appreciate the help of the Boy Scouts in disposing of a quantity of paper.

The trustees acknowledge with gratitude the gifts of one

thousand dollars from the Hancock Woman's Guild toward renovation of the building, of an anonymous hundred dollars for reference books, of many fine books and memorial gifts.

Harriet Hampson returned in September as Children's Librarian, replacing Flora Frank who served on a temporary basis. Sally Hamilton has continued to provide colorful and provocative wall displays by New Hampshire artists.

Doris Rogers has completed a course on reference books entitled "The Library as an Information Center" given by the State Library.

Frances W. Russ, Chairman  
Harry E. Casler  
Edward P. Wells

## REPORT OF HANCOCK PLANNING BOARD

In presenting changes in our Zoning Ordinance this year, we have given much thought as to how best to preserve the atmosphere of Hancock as we know it. Our public hearings have helped give us an insight of your thoughts. Most of our non-natives moved here because of what our town appears to be — a typical New England village.

We urge your support in changing our recreational district to a residential district. This should help protect Norway Pond from possibly becoming an overbuilt area of small camps and thus spoiling one of the town's greatest assets.

Our position on sand, gravel and clay banks seems like common sense to us and is ecologically as sound as we can make it.

The public hearings left very little doubt that people were not in favor of new apartment houses. Accordingly, we propose that new apartment houses be allowed in the commercial district only. Hancock has never been a village of apartments. It raises many problems in regard to water supply, roads and the dump situation.

Perhaps the most important issue is the establishment of a Historic District. This year we can set up a Historic District Commission and next year we can define district boundaries for same. We have been urged by several out-of-town people to do that in the past and now some of our neighbors like the idea. Our main street, for example, is outstanding and thus far has changed very little over the years. We think it is essential to preserve it.

We recommend the appointment of a building inspector as being essential to our building code. Due to increasing activity the selectmen find it impossible, with their other duties, to make the necessary inspections.

After studying the fine and comprehensive report of the Dump Committee, we fully approve the use of the land, site and access road and its impact on the community as a landfill operation.

The Planning Board always welcomes any comments and ideas you may have to better our village and its environs.

TOWN OF HANCOCK  
AUDITOR'S REPORT FOR 1972

We have examined the accounts of the following:

Selectmen  
Town Treasurer  
Town Clerk  
Tax Collector  
Collector of Water Rents  
Treasurer of Town Common  
Treasurer of Public Library  
Treasurer of Fire Department  
Police Department  
Old Home Day Committee  
Treasurer of Recreation Committee  
Trustees of the Trust Funds  
Road Agent  
Treasurer of Conservation Commission

We have found all accounts in order as regards Income and Expense, with proper vouchers issued to substantiate same. Balances check with reconciled bank balances in all areas where applicable.

Respectfully submitted,

A.M. Lyon  
W.L. Ensor  
Auditors

## REPORT OF THE DUMP STUDY COMMITTEE

This is the final report of the Hancock Dump Study Committee. A more detailed version of this report has been submitted to the Selectmen. In addition, an interim report appeared in the Town Report for 1971 and the Selectmen received a preliminary report on December 23, 1972.

### *Highlights of the report*

The Dump Study Committee recommends that Hancock develop and utilize a Sanitary Landfill (SL) at a Town-owned, 2-1/2 acre site adjacent to the current open-burning dump. After analyzing other possible alternatives, both within and outside of Hancock, the Committee regards its recommendation as the least expensive way to comply with the State's no-burning deadline of July 1, 1975. The proposed SL site has an estimated life of 12 years. On January 3, 1973, the State's Director of Public Health conveyed his approval of the site from an environmental standpoint. A detailed map of the proposed site is available for study in the Town Clerk's office. (Also available at the Town Clerk's office are projections of Town population growth and solid waste accumulation.)

"Sanitary landfill" means that, rather than burn refuse, the Town would bury it by applying a layer of cover each day the SL operates. In so doing, smoke and odor are eliminated, and insects and vermin effectively controlled. The American Society of Civil Engineers defines "sanitary landfill" as follows: "A method of disposing of refuse on land without creating nuisances or hazards to public health or safety, by utilizing the principles of engineering to confine the refuse to the smallest practical volume, and to cover it with a layer of earth at the conclusion of each day's operation, or at such more frequent intervals as may be necessary."

The average annual cost of the SL would be \$12,200, which is about \$7,600 more than the yearly cost of the present burning dump but approximately \$1,800 per year less than the next cheapest alternative. The \$12,200 figure is based on the following assumptions, among others:

1. The SL will be open eight hours daily, three days per week.
2. By July 1975, the Highway Department will require a substantially heavier payloader than its current model regardless of whether there will be a SL. This payloader will be "rented" by the SL 12 hours each week.
3. Right-of-way questions, if any, with regard to the access road to the SL will be adequately resolved. (This refers to the same

road currently used for access to the open-burning dump.)

When computing annual cost, the Committee has included three principal elements: (1) capital outlays (for equipment, site development, facilities), (2) operating costs (salaries for SL personnel, expenses incurred in operating equipment, etc.), and (3) costs incurred by residents in transporting refuse from their homes to the SL.

As indicated, the State's no-burning deadline for Hancock is July 1, 1975. The Committee strongly advises that the Town take advantage of this "breathing room" (1) to spread out the initial investment required to develop the SL site and provide adequate facilities and (2) to conduct limited experimentation regarding landfill procedures so that major operating problems, if any, can be discovered and solved *before* the no-burning deadline.

From the outset, the Committee has operated under these guidelines: (1) all dump possibilities that, as a practical matter, are available to Hancock would be explored; (2) the basic goal of the Committee is to determine the least-cost solution to the dump question; (3) the Committee's ultimate recommendation, while offering a solution that could be utilized for many years, should not involve such a great initial expenditure of funds that the Town would be locked in to a solution for an excessive period, thereby denying Hancock the flexibility to select a cheaper alternative if one should present itself after ten years or so; and (4) even if the Committee should recommend that Hancock share the dump of another Town, an in-Hancock alternative would be needed to serve as a fall-back option should subsequent difficulties arise with a dump-sharing arrangement.

#### *Early work of the Committee*

Article 13 in the Town's 1971 Warrant spelled out the Dump Study Committee's responsibilities: "to study the problems of the present town dump, possible future sites for a new dump, and possible arrangements for combining efforts with other towns on a dump, and to report to the Town Meeting in 1972 with recommendations, or take any other action relating thereto." (At the 1972 Town Meeting, the life of the Committee was extended one year.)

Committee members spent substantial time familiarizing themselves with the full range of methods for solid waste disposal, including those in the experimental stage as well as those in actual operation. This was achieved by speaking with Federal (Environmental Protection Agency), State, and local officials; reading many publications; viewing several films; talking with executives of

corporations in the solid-waste disposal field; and traveling to other towns for a firsthand look at various incineration, recycling, and landfill techniques.

Concurrently, the Committee was attempting to locate possible dump sites, both within and outside of Hancock. The following letter was sent to the Selectmen of Antrim, Bennington, Greenfield, Harrisville, and Peterborough:

"Among the responsibilities assigned to the Hancock Dump Study Committee is the exploration of 'possible arrangements for combining efforts with other towns on a dump.'

"If current or future plans for your dump include the possibility of a shared-use arrangement, the Committee would appreciate receiving this information."

Two affirmative replies were received, from Bennington and Peterborough. The details of possible dump-sharing arrangements with those two towns are described later in this report.

Many potential landfill sites (old gravel pits, etc.) in Hancock were visited. Several letters were sent to the owners of these sites to determine if the land might be for sale or lease. One affirmative reply was received, which the Committee followed up as described later. The Committee also decided to explore how the burning dump might be converted into a landfill site.

Also during the early period of the Committee's work, members spent many hours trying to determine the boundaries of the Town-owned land on which the present burning dump is located. This necessitated many trips to Nashua to conduct title searches and required considerable exploration at and around the site of the present dump to locate boundary markers and the like. The end result of this extensive research and survey work is the map available for inspection at the Town Clerk's office. In conjunction with this surveying, the dump was measured in June 1971. This would serve as a benchmark against which to compare another such measurement about one year later. These two measurements would yield an indication of the rate of solid waste accumulation in Hancock.

### *Obtaining firsthand knowledge of the possible options*

As opportunities presented themselves, Committee members visited other dumps to gain firsthand information about their operation, problems, cost, etc. The following sanitary landfill sites were visited: Bennington, Milford, Peterborough, and Somers (Connecticut). Sites visited utilizing incineration methods were Conway and Waterville Valley. In Addition, the Committee in-

vestigated reports that a major recycling center would operate in Manchester.

Regarding the landfill sites, most required that heavy, bulky items — such as refrigerators and stoves — be placed in a special area at the dump. The same was true for brush and stumps. Most sites had sheds where bottles and papers could be deposited for recycling purposes. And most sites banned auto bodies and septic tank and sewage sludge as well as highly corrosive materials. Some banned the deposit of debris by commercial demolition companies. All sites have at least one attendant on duty during dump hours. Generally, as part of their compensation, attendants are given salvage rights.

The annual operating cost of the Somers' landfill is about \$12,500. (About 5,000 residents in Somers.) The initial investment required to develop Bennington's site was \$30,000. When the Bennington landfill was open 2-1/2 days weekly, the annual operating cost was about \$12,000. (The site serves both Bennington and Antrim — about 3,000 people, including the college population.) Bennington recently announced that its landfill would be open seven days weekly, at a "moderate" cost increase. Unofficially, this could raise the annual cost to at least \$16,000. Both Somers and Bennington contract out the operation of the landfill, although the towns own the sites. In Milford (landfill adjacent to former burning dump) and Peterborough, the landfills are municipally operated.

The selection by Waterville Valley of the incineration method was dictated, in large part, by a scarcity of land. (The town is surrounded on four sides by U.S. Forest Service lands.) The incinerator is a Mark VI Radicator, costing in the vicinity of \$18,000-\$20,000 (including installation). According to a Waterville Valley official, the total initial investment was \$25,000 (Radiator, special wiring, building to house incinerator, access road, etc.). The Mark VI, smallest of the Radicator models, burns 600 lbs. of refuse per hour and is reported as adequate for a community of 2,000. (Waterville Valley population: 1,200, summer; 3,000, winter.)

The incinerator is hand-fed by two attendants. The town furnishes residents with plastic bags for refuse. A service contractor who estimates that incineration costs are 25 percent greater than landfill arrangements, picks up the bags and operates the incinerator, which meets air quality standards. Bottles, which can cause slag problems in the Radicator, are separated from other refuse. Large items — stoves, bedsprings, etc. — are not accepted by the incinerator and are kept in a separate area. Residue from in-

cineration must be disposed of. (Typically, according to solid-waste authorities, a small landfill must be operated to accommodate incineration residue.)

Spearheaded by the North Country Resource Conservation and Development Project, the experimental open-pit incinerator at Conway serves a peak population of 25,000 and is described as economically inappropriate for a population of under 10,000. The capacity of the incinerator, which has not yet met air quality standards, is about four tons per hour. The unit burns anything except glass (bottles are placed in a trench and covered), toxic plastics, and bulky items, such as refrigerators. Residents dump their refuse in a building at the incineration site; refuse is pushed into the open-pit incinerator by one of two attendants, who operate a small John Deere bucket loader.

An official estimates that, at today's prices, an open-pit incinerator could be constructed for \$35,000 plus the cost of the land on which it would be located. The bucket loader costs \$5,000. Annual operating cost (attendants' salaries, electricity, maintenance, amortized capital costs, etc.) is \$19,000.

In the area of recycling, the Committee checked out information that All American Environmental Control Corp. might construct a \$2-million recycling facility for Manchester. Replying to a Committee letter, the firm's president indicated that "we are in serious discussion with Manchester and we hope that these discussions will result in a long-term contract to recycle the wastes of Manchester — and very likely those of surrounding towns." Reportedly, towns as far west as Keene would haul their refuse — unseparated — to the recycling facility. The facility would charge about \$7 per ton. There would be transportation charges in addition. Recent reports indicate that, at best, plans for such a facility are dormant.

Perhaps the major conclusion reached by the Committee as a result of its research is that, although recycling and incineration are, theoretically, possible solutions to Hancock's solid-waste disposal problem, as a practical matter they are not appropriate for Hancock at the present time. (This is not to say, however, that the Town should discourage voluntary recycling efforts. Quite the contrary, as noted later in this report.

Recycling is not appropriate because of the current lack of an adequate recycling facility. Incineration does not seem to be the answer at the present time because (1) it is uneconomical for a town the size of Hancock and (2) the air quality standards to which incinerator units must conform have undergone frequent changes,

almost always in the direction of stricter requirements.

When Hancock doubles its present size and when air quality standards and incinerator technology stabilize, more serious consideration should be given to incineration. Also, the Town should closely monitor developments in large-scale recycling within the State. For the present, therefore, the Committee concluded that a sanitary landfill approach was the most practical course to pursue.

#### *Gathering details on possible landfill sites*

As indicated earlier, the Committee's inquiries had resulted in the identification of four possible landfill sites: two in Hancock, and two outside of Hancock.

Bennington and Peterborough were the two out-of-Town sites. Peterborough indicated it would charge the Town \$8,000 yearly for usage of the landfill, which is 8.8 miles (round trip) from the Hancock fountain (intersection of Main St. and Route 137). This figure would apply through 1975, at which time another figure would be computed and would apply for a five-year period. The \$8,000 annual charge would compensate Peterborough for operating expenses only; Hancock would not thereby obtain an interest in the land and thus would not receive a share of the proceeds if and when Peterborough sold its landfill site.

Bennington and Antrim share the use of a landfill located in Bennington, a round-trip distance of 14.8 miles from the Hancock fountain. Both capital and operating costs are shared on a pro rata basis, according to population. Should Hancock also utilize Bennington's landfill, the Town would pay about 25 percent of these costs. As noted earlier, capital costs (surveying, purchase of site, etc.) amounted to \$30,000. This would require a one-time initial payment of \$7,500 from Hancock. Operating costs are estimated at \$12,000 yearly, making Hancock's annual share \$3,000. (Bennington has recently increased the number of days the dump is open, which would increase Hancock's annual payment to perhaps \$4,000.) If and when Bennington sold its landfill site, Hancock would share in the proceeds in the same proportion as its original capital contribution. The Town would sign a ten-year contract with Bennington, renewable at Hancock's option for an additional ten years.

One of the possible Hancock landfill sites is located on the Greenfield side of Route 202. An access road to the site would have to be constructed. According to conservationists of the U.S. Soil Conservation service who inspected the site, "the property would, in all probability, be more costly to operate" than the site directly

adjacent to the present dump, which was also inspected by the conservationists (May 9, 1972).

The site adjacent to the current dump, the second in-Town possibility, is on Town-owned land, as determined by the Committee's title searching and surveying. It is a 2-1/2 acre plot of land directly east of the current dump. Round-trip distance from the Hancock fountain is 1.2 miles. The State's Director of Solid Waste Management reviewed the Committee's work and inspected the proposed site on December 8, 1972. He voiced approval of the location; that is, it conforms to the State's environmental requirements. This was confirmed by a letter (January 3, 1973) from the State's Director of Public Health.

### *Hancock's future requirements for solid waste disposal*

Having reduced possible landfill sites to three (Bennington, Peterborough, and the one adjacent to Hancock's current dump), the Committee needed to relate these potential sites to Hancock's future requirements for solid waste disposal. Two questions had to be answered before these requirements could be determined. First, what is Hancock's current per capita accumulation of solid waste? Second, what is a reasonable projection of Hancock's population growth?

Through two surveys which measured the size of the dump (on June 15, 1971, and again on May 6, 1972), the Committee determined that Hancock was accumulating solid waste at the rate of 3,100 cubic yards per year. Assuming each cubic yard weighs 1,000 lbs., the Committee estimates that Hancock accumulates solid waste at the rate of 9-1/2 lbs. per day for each year-around resident. This, of course, includes not only routine household refuse but also refrigerators, stoves, construction debris, etc., as well as cover material applied to the dump periodically. And it includes the refuse deposited at the dump by summer residents.

To estimate solid waste accumulation in future years, certain assumptions regarding Hancock's population growth had to be made. The Committee assumed that Hancock's year-round population not only would grow but would grow at an accelerated rate. By 1990, we project Hancock's population at 1,800, about double today's figure. Although this is a higher growth rate than some estimates the Committee has seen, our projection seems well within the bounds of reason. Obviously, massive development of Hancock could push the Town's population to 1,800 in a matter of just a few years — a not unheard of occurrence. However, we assume the Town will not permit this to happen. (We also assume the ab-

sence of businesses that would significantly alter our projections for solid waste accumulation.)

Assuming solid waste accumulates at the rate of 9-1/2 pounds per day per year-round resident (a rate significantly above the national average even though the figure includes solid waste deposited by summer residents), and assuming the population growth indicated above, Hancock will accumulate 4,700 cubic yards of solid waste during 1984 and 6,030 cubic yards during 1990. This contrasts to a current annual accumulation rate of 3,100 cubic yards. The following table summarizes the situation:

<i>Year</i>	<i>Population</i>	<i>Solid waste accumulated during the year (Cu. yds.)</i>	<i>Total accumulation of solid waste at dump (Cu. yds.)</i>
1972	940	3,100	14,350
1984	1,400	4,700	60,930
1990	1,800	6,030	93,225

Charts of these projections are available for inspection at the Town Clerk's office.

Given these projections, will all three of the potential landfill sites (Peterborough, Bennington, and Hancock) be able to accommodate that amount of solid waste over a 10- or 12-year period?

Each being located on approximately 75 acres of land, both the Bennington and Peterborough sites could accommodate Hancock's projected volume of refuse.

The Town-owned 2-1/2 acre site adjacent to the present burning dump could contain about 12-years worth of solid waste accumulation if:

1. Areas at the site above Elevation 840 are excavated down to Elevation 840. (Elevations vary from 852 to 833 feet.)

2. Cover material is applied in the ratio of one part compacted cover to four parts compacted refuse.

3. Solid waste is deposited at the site until the landfill reaches Elevation 856. (Allowing about 3 feet for final settling, the final elevation of the landfill should closely approximate the final elevation of the current burning dump.)

A key assumption, which the Committee and others whom it contacted regard as reasonable, is that a given poundage of refuse deposited at the landfill will, after compaction, occupy the same space as it would have at our present burning dump. This seems to be valid for the following reasons:

1. During the period when the dump was being measured to determine the current annual accumulation rate of 3,100 cubic yards (or 9-1/2 pounds per year-round resident per day), there was not an attendant at the dump and, as a result, not all burnable refuse was actually burned.

2. In addition to the voids caused by this unburned and largely non-compacted refuse, many space-consuming cavities were produced by bulky items, such as refrigerators and stoves. These items, as well as brush and stumps, would not be deposited in the 2-1/2 acre landfill. They would be placed in area adjacent to the site.

Thus the Committee concluded that, for planning purposes, the volume reduction resultant from compaction at the proposed landfill would closely approximate the volume reduction obtained by burning at the present dump.

The Committee considers the estimated 12-year life of the landfill as adequate. Because of rapidly changing developments in the field of solid waste disposal, a solution with a longer life might deprive Hancock of the flexibility to take advantage of cheaper solutions that may present themselves in the next seven to ten years. For example, perhaps by 1980 air quality standards and incineration technology will have stabilized so that, in view of Hancock's greater 1980 population, utilization of an incinerator would then prove more economical. Or the recycling complex proposed for Manchester might then be a reality and represent a cheaper solution than a landfill operation. If the Town today invests in a 20-year solution to the dump problem, Hancock's ability to take advantage of future cheaper alternatives would be greatly reduced and/or delayed.

Future expansion of the 2-1/2 acre site could be assured by the Town's acquisition of a tract of land immediately to the south of the site. (This would also conclusively resolve whatever right-of-way questions there may be regarding the access road to the present and proposed future dump; this road runs through non-Town land to the south of the proposed site.)

Therefore, none of the three potential landfill sites (Bennington, Hancock, Peterborough) can be ruled out on grounds of insufficient capacity to accommodate Hancock's solid waste.

The balance of this report consists of a cost analysis to determine which of the three landfill approaches (Bennington, Peterborough, Hancock) is the most economical. We will first evaluate three ways to utilize the Bennington Landfill and then explore three methods by which to share Peterborough's Landfill. The cost of Hancock's proposed Landfill is analyzed, as is the cost of

operating the current burning dump. We conclude with a cost summary and recommendations.

Implicit in the following cost analysis is a Committee conclusion that the true cost to Hancock residents of utilizing any Landfill must include the cost of transporting refuse from home to landfill. Thus the total cost assigned to each landfill possibility below includes not only the tax impact but also out-of-pocket costs.

#### *Bennington Possibility No. 1*

Hancock residents transport their refuse to the Bennington-Antrim (B-A) Landfill in their own vehicles. Round-trip to B-A Landfill from Hancock fountain at intersection of Bennington Road and Main Street is 14.8 miles. Assume 250 year-round Hancock families. Assume car/truck expense of 10 cents per mile. Assume one trip weekly for "routine refuse." One trip yearly for big items.

#### *Cost Breakdown — Annual*

Cost of transporting routine refuse from home to B-A	\$19,240
Cost of transporting big items (refrigerators, etc.) to B-A	370
Hancock's pro rata share of B-A operating expense	3,000*
Hancock's pro rata share of capital expenditure, allocated over ten years (minimum term of the contract)	750**
Hancock's cost of closing its current dump, allocated over ten years	100
	<hr/>
	\$23,460

\*This figure could increase over the years because of inflation or because the Landfill is open additional days. On the other hand, it could be lower by as much as \$1,000 if other towns tie in with the B-A Landfill.

\*\*Hancock might recover this in the distant future when and if the B-A Landfill is sold. This figure could be as low as \$500 if additional towns tie in with the B-A Landfill.

#### *Bennington Possibility No. 2*

Hancock's year-round families all decide to pay 75 cents weekly (current regulated rate) to a commercial hauler, who would transport each family's refuse from home to B-A Landfill. Assume 250 year-round Hancock families. Assume each family fills with refuse not more than three garbage cans (extra charge for each can over three). Assume one trip yearly via personal car/truck to B-A (14.8

miles round-trip from fountain @10 cents per mile) to deposit big items.

*Cost Breakdown — Annual*

Cost of transporting routine refuse from Home to B-A	\$9,750***
Cost of transporting big items to B-A	370
Hancock's pro rata share of B-A operating expense	3,000*
Hancock's pro rata share of capital expenditure, allocated over ten years (minimum contract period)	750**
Hancock's cost of closing its current dump, allocated over ten years	100
	<hr/>
	\$13,970

\*See note under Bennington Possibility No. 1

\*\*See note under Bennington Possibility No. 1

\*\*\*Conceivably, the Public Utilities Commission could authorize higher rates for commercial haulers within ten years.

*Bennington Possibility No. 3*

Place three 12 cubic yard compactors (similar to the one behind the A&P in Peterborough) at the Hancock Dump. Each compactor would be picked up twice weekly and emptied at the B-A Landfill. (Current accumulation at Hancock Dump is 60 cubic yards/week.) Rental for each compactor: \$20/week. Charge for each pick up: \$15. The Hancock Dump would be open three days weekly, eight hours per day. An attendant would be paid an average of \$2.50/hour over a ten-year period. He would operate the compactors. Heavy items (refrigerators, etc.) would not go to Bennington but accumulate at the Hancock Dump. Assume 250 year-round families, who make one trip/week to Dump with routine refuse. Distance from fountain to Dump and return is 1.2 miles. Car expense is 10 cents per mile. Assume each family makes one trip yearly to Dump to deposit big items.

*Cost Breakdown — Annual*

Cost to transport routine refuse from home to Hancock Dump	\$1,560
Cost to transport big items to Hancock Dump	30
Salary of attendant	3,120
Insurance and fringe benefits	300

Cost of three compactors and a total of six weekly pickups	7,800***
Hancock's pro rata share of B-A operating expense	3,000*
Hancock's pro rata share of capital expenditure, allocated over ten years (minimum contract period)	750**
Hancock's cost of closing its current dump, allocated over ten years	100
	<hr/>
	\$16,660

\*See note under Bennington Possibility No. 1.

\*\*See note under Bennington Possibility No. 1.

\*\*\*This figure could be affected by inflation.

#### *Peterborough Possibility No. 1*

Hancock residents transport their refuse to Peterborough's Landfill (PL) by car/truck. Round-trip distance to PL from Hancock fountain (intersection of Bennington Road and Main Street) is 8.8 miles. Other assumptions are the same as described under Bennington Possibility No. 1.

#### *Cost Breakdown — Annual*

Cost to transport routine refuse from home to PL	\$11,540
Cost to transport big items from home to PL	220
Hancock's share of PL operating expense	8,000*
Hancock's cost of closing its current Dump, allocated over ten years	100
	<hr/>
	\$19,860

\*This figure is valid through 1975, at which time the item would be recomputed for a five-year period. Presumably, the figure will be higher.

#### *Peterborough Possibility No. 2*

Hancock's 250 year-round families all decide to pay 75 cents weekly to a commercial hauler, who would transport each family's refuse from home to PL. Except for the 8.8 mile round trip distance to PL, other assumptions are the same as in Bennington Possibility No. 2.

*Cost Breakdown — Annual*

Cost to transport routine refuse from home to PL	\$9,750**
Cost to transport big items to PL	220
Hancock's share of PL operating expense	8,000*
Hancock's cost of closing its current Dump, allocated over ten years	100
	<hr/>
	\$18,070

\*See note under Peterborough Possibility No. 1.

\*\*Conceivably, the Public Utilities Commission could authorize higher rates for commercial haulers within ten years.

*Peterborough Possibility No. 3*

This possibility is similar to Bennington Possibility No. 3: three 12 cubic yard compactors placed at the Hancock Dump, with six pick-ups weekly. Assumptions are the same as noted in Bennington Possibility No. 3, except the round-trip distance to PL is 8.8 miles.

*Cost Breakdown — Annual*

Cost to transport refuse from home to Hancock Dump	\$1,560
Cost to transport big items to Hancock Dump	30
Salary of attendant	3,120
Insurance and fringe benefits	300
Cost of three compactors and a total of six weekly pick-ups	7,800
Hancock's share of PL operating expenses	8,000
Hancock's cost of closing its current dump, allocated over ten years	100
	<hr/>
	\$20,910

\*See note under Peterborough Possibility No. 1.

\*\*This figure could be affected by inflation.

*Hancock Sanitary Landfill*

A 2-1/2 acre, circular plot of land directly east of the present dump would be operated as a Sanitary Landfill (SL). The State has indicated its approval of this site. The SL would be open three days weekly, 8 hours per day. An attendant would be paid at a rate averaging \$2.50/hr. over the next 12 years. The deposited refuse

would be covered with fill at the end of each operating day — one part cover to four parts refuse. (Estimated cover requirement over life of SL is 9,400 cubic yards, minimum; 16,400 cubic yards, maximum.) Big items — brush, refrigerators, bed springs, stoves, etc. — would be segregated in a special area at the SL. Relating the measured accumulation of refuse at the current dump during a recent 12-month period to the projected population increase (an accelerated growth rate assumed) of Hancock between now and 1990, the proposed SL has a estimated life of 12 years, assuming the SL will eventually reach Elevation 856.

Elevations at the proposed site currently range from 852.9 to 833. All elevations above 840 would be excavated down to 840. (This could yield about 9,500 cubic yards of cover material.) When the landfill reaches capacity, its final elevation — after settling — would closely approximate the elevation of the adjacent former burning dump. The combined acreage of the former burning dump and the completed landfill could be used as a recreational area.

Assume 250 year-round Hancock families. Assume one trip weekly per family to the SL for routine refuse, one trip yearly for big items. The round-trip distance to the SL from the Hancock fountain (intersection of Bennington Road and Main Street) is 1.2 miles. Assume a car/truck expense of 10 cents per mile. The following cost breakdown also assumes that the Highway Department will require a substantially heavier payloader in one or two years regardless of whether there will be a SL. Payloader would spend 12 hours weekly at SL. Assume purchase price of payloader is \$35,000 and is financed over a eight-year period in equal payments (5% interest).

### *Cost Breakdown — Annual (Average)*

#### *Initial Investment*

1. Development of SL site	
(a) Clear trees and burn brush @\$500/acre	\$1,250
(b) Clear stumps	1,000
(c) Excavate and stockpile cover material	
(Cover material now on the site above	
Elevation 840 is estimated at 9500 cubic yards)	9,500
(1) Blasting	2,000
(d) Close current dump: rat extermination and seal	
slopes with 1 foot of cover	1,100
	<hr/>
<i>Site Development Total:</i>	\$14,850

2. Facilities*	
(a) Water (line to Moose Brook, pump, hose)	\$800
(b) Electric service	950
(c) Shed for attendant's shelter and salvage	500
(d) Recycling shed(s)	100
(e) Portable fencing	800
	<hr/>
Facilities Total:	\$3,150
(Initial Investment Total: \$18,000)	

*Operating Cost — Annual*

1. Attendant (24 hrs./week @\$2.50/hr.)	\$3,120
2. Attendant insurance and fringe benefits	300
3. Maintenance (sheds and hand tools)	80
4. Payloader and operator	5,000***
5. Purchase of cover	600***
	<hr/>
<i>Annual Operating Cost Total:</i>	<i>\$9,100</i>

*Total Annual Cost [Initial Investment plus Operating Cost plus Transportation]*

1. Initial SL investment allocated over 12 years	\$1,500
2. Annual operating cost of SL	9,100
3. Cost of transporting routine refuse from home to SL	1,560
4. Cost of transporting big items from home to SL	40
	<hr/>
<i>Average Annual Cost:</i>	<i>\$12,200</i>

\*Some of these facilities may not be needed, however, they are included here so that there will be no surprises should they all be required.

\*\*Assuming that a maximum of 16,400 cubic yards of cover will be required over the life of the SL, the 9,500 cubic yards of cover expected from site excavation would be expended by year No. 8. Thus additional cover would have to be purchased during the final four years or so of the SL.

\*\*\*This figure is derived as follows. *First*, the total annual cost to the Town to use the payloader for *all* purposes was computed:

\$7,000	Salary and fringe benefits of operator
5,400	Annual payment for each of eight years to bank —
	includes interest plus <b>principal</b>

2,100	Diesel fuel @\$8/day
800	Tire maintenance
800	Other maintenance
200	Insurance

---

\$16,300    Yearly cost to Town of payloader and its operator

If payloader operates 260 days per year (52 x 5), daily cost to Town is \$62.70/day. *Second*, the cost of using the payloader for SL purposes only was computed. Assume payloader is needed at SL 4 hours/day, 3 days weekly, or 12 hours/week. At \$62.70/day, this means the SL should be charged \$94 per week for the payloader and its operator. On an annual basis, this amounts to \$4,880 (94 x 52). Call it \$5,000/yr.

#### *Cost of current burning dump*

Assume a round-trip distance of 1.2 miles from home to Dump. Assume 250 year-round families travel once weekly to deposit routine refuse, once annually for big items. Dump open three days weekly.

#### *Cost Breakdown — Annual*

Cost to transport routine refuse from home to Dump	\$1,560
Cost to transport big items to Dump	30
Salary of attendant @\$2 per hour	2,496
Cost of cover material	250
Cost of machine and operator to spread cover, etc.	250
	<hr/>
	\$4,586

#### *Cost summary and recommendations*

In order of increasing cost, the preceding options are ranked as follows.

#### *Options Ranked by Average Annual Cost*

1. Hancock's Current Burning Dump	\$ 4,586
2. Proposed Hancock Sanitary Landfill	12,200
3. Bennington Possibility No. 2	13,970
4. Bennington Possibility No. 3	16,660
5. Peterborough Possibility No. 2	18,070
6. Peterborough Possibility No. 1	19,860
7. Peterborough Possibility No. 3	20,910
8. Bennington Possibility No. 1	23,460

The Dump Committee concludes that total costs to Hancock residents (taxes plus out-of-pocket costs) would be minimized if the Town proceeded on the basis of developing and utilizing a Sanitary Landfill at a site adjacent to the present burning dump.

The no-burning deadline for Hancock is July 1, 1975. The Committee strongly advises that the Town take advantage of this "breathing room" (1) to spread out the estimated \$18,000 initial investment and (2) to conduct limited experimentation regarding landfill procedures so that major operating problems, if any, can be discovered and solved *before* the no-burning deadline.

The Committee recommends that the initial investment be allocated as follows: 1973, \$7,000; 1974, \$6,000; 1975, \$5,000. If this is done, the Town could phase into a Sanitary Landfill operation on a relatively equalized-cost basis:

	1973	1974	1975	1976
Cost of burning				
Dump	\$ 4,586	\$ 4,586	\$ 2,293	
SL initial investment	7,000	6,000	5,000	
SL operating cost			5,050	10,100
<i>Totals:</i>	<u>\$11,586</u>	<u>\$10,586</u>	<u>\$12,343</u>	<u>\$10,100*</u>

\*Because the initial investment of \$18,000 was spent in the 1973-1975 period, \$1,500 is deducted from the average annual cost figure of \$12,200. Another \$600 is deducted inasmuch as the Town will not have to purchase cover material in 1976. \$12,200 — \$2,100 = \$10,100.

The recommendation to develop and utilize a SL in Hancock is dependent on the validity of two major assumptions. First, a substantially heavier payload loader will be required by the Town by July 1975 regardless of whether there is a SL. The Highway Department has indicated such a need.

Second, the access road to the SL (which would be the same as the current dump road) will not encounter right-of-way problems with regard to that portion of it running through land not owned by the Town. Inasmuch as considerable money would be necessary to develop the SL site, the Dump Study Committee strongly recommends that this right-of-way be adequately assured, even through the Town's purchasing, or otherwise securing control of, the property (+ or — 9 acres) directly south of the proposed SL. (If the property were acquired, this would also permit future expansion of the SL.)

The Committee considers as desirable the acquisition by the Town of the property (+ or — 4 acres) east of the proposed SL. Although we are certain that the proposed SL does not intrude upon that land, this could be conclusively resolved by the Town's acquisition of said property.

We also strongly urge the Town to support voluntary recycling efforts, such as those directed at glass and paper. Such efforts mean that less refuse would be deposited in the Landfill and, therefore, the site will have a longer life at no additional cost to the Town.

As a final observation, whenever there was reasonable doubt about which of two or more possible cost figures to use when computing the dollar estimate for the Hancock SL, the Committee selected the higher figure. Thus there is a likelihood that the cost total for the SL will be lower than the annual \$12,200 estimate cited in this report, perhaps by as much as \$1,000 yearly. Of course, costs would be substantially reduced if the Town decided to open the Landfill for only two days weekly — this would reduce our \$12,200 estimate to at least \$8,600.

Committee members would be pleased to answer any questions about this report, whose recommendations we feel are in the best interests of the Town.

## REPORT OF TOWN HALL SPACE COMMITTEE

The committee suggests that the space problems in the Town Hall be solved in two phases:

*Phase I.* To be put into effect forntmen1973 Town Meeting.

A. The election will be at the usual time but the business meeting will take place at a later time, probably on the following Saturday afternoon. There will be no space problem for the election portion of the meeting.

B. The business meeting will be conducted from the stage. The area for the voting booths will be reduced to one third of its present size. There should be no food table within the Town Hall area. The effective increase in seating capacity will be approximately 30%.

*Phase II.* For Future implementation when Phase I is no longer adequate.

A. The removal of the stage area and associated partitions with possible replacement by a portable, sectional stage when the stage is needed. The voting area would then be relocated to the former stage area adjacent to the location for conducting the business meeting. The effective increase in seating area over what is presently available would be approximately 50%, again with no Town Hall space utilized by the food table.

B. The cost of Phase 2 without any provision for a portable, sectional stage would be approximately \$7,500.00. This would include the relocation of all hot air piping, a new oak floor in the stage area, and repainting of the new area.

## REPORT OF THE HANCOCK TOWN HISTORY COMMITTEE

The work of the Committee was begun with the removal from dead storage of the town collection of old papers, vouchers, legal documents, accounts, news clippings, and photographs. The collection is now in the Town Office Building, where some sorting and organizing has been done.

Progress by the Committee thus far involves examination of church records, as well as fresh research into the subjects of local Indians, area topography, and geology. The use of tape recorders has greatly facilitated the taking of interviews with long-time residents and the collecting of historical information.

A comprehensive outline for the history has been made. It is intended to summarize and supplement the first hundred years, which were covered by the Hayward volumes of 1889, and to compile in more detail the story of subsequent decades.

It is the urgent plea of the Committee that material pertaining to any phase of the town history (papers, diaries, land records, account books, photographs, etc.), which may still be in private hands, may be brought out of the attics and loaned to the Committee for further examination.

Respectfully submitted,

Eleanor Amidon  
Mary J. Hibbard  
Olive S. Rhines  
Thomas B. Rhines  
Doris S. Rogers

January 16, 1973

## REPORT OF THE HANCOCK ZONING BOARD OF ADJUSTMENT

In order to cover the cost of the required advertising connected with public hearings before the board it was voted at a meeting held June 7th to amend the by-laws by establishing a fee of \$5.00 for such hearings, the fee in each case to accompany the hearing application.

During 1972 the board was called upon to hold but one public hearing, this to consider an application for a variance by Michael Aldrich because the property he planned to build on had insufficient frontage to meet the requirements of the zoning ordinance. Since access to the property by private driveway was deemed adequate and since Mr. Aldrich agreed that the town could not assume responsibility for maintenance of the access in any way, the variance was granted.

## HANCOCK 1972

Hancock is located in one of the fastest growing sections of fast growing New Hampshire. Mollers real estate office has a busy look; Russ & Shirley Johnson at the store are beaming; Bud Wilder and Bob Fogg are busy bees; Charlie Gleason is up to his ears in work.

Without our knowing it one by one or rather two by two new citizens build houses or restore old houses. If you are reading this in 1983, ten years from now, chances are good that the head count will be nearing 2,000. Incidentally, just before the Civil War — including Bennington — it was close to 1,500, currently in round figures it is 900.

Imperceptibly change comes to Hancock. Car by car adds to the traffic on Main Street and trucks get bigger, some laden with Scorpion snowmobiles. Yet in the serenity of the early morning and after six the peals of the Paul Revere bell in the church tower can be clearly heard in the village. We still have our rural character with the megalopolis 60-70 miles away.

Our intimate doings are always against a backdrop. Richard Nixon in 1972 won an outstanding victory. He made a historic visit to China. The war in Vietnam seemed to be over, the stock market was strong; the general economy stronger; inflation worried us. The last, for this century, of the series of moon walks by astronauts was successful. Woman's Lib was in the national news and sex films unrestrained. The drug scene which plagues youth was, hopefully, being met by stronger laws, the occasional hijacking of passenger planes to Cuba caused only a ripple. The days when we cared little of news events from far away is long past.

It is just not possible to categorize the Hancock of today. Is it a retirement hideaway? A summer resort? A suburb of Peterborough? It is easier to say what it is not. It is not a manufacturing or trade center, nor is it a farming area and despite acres and acres of woodlands it currently produces little timber or cordwood. What we do is so varied as to excite curiosity. The list would be long and interesting. There are citizens whose home is here who are working in Madagascar, in the Bahamas, etc., several commute weekly to New York City or Washington not to mention places within 75 miles. Weekenders, mostly from the Boston area own places and keep them up. Try to find a name on the check list who isn't up to something interesting.

Of those working out of town Ken Cragin, one of our old timers, was mentioned in The Ledger. He runs a colorful garage in the town of Greenfield. He has done this for 52 years, ever since graduation

from Wentworth Institute in Boston. Over there we often take our cars for alignment for we know he will do an excellent job.

Two who were active in politics in Concord and who gave for many years Hancock a voice in both the Senate and House did not run for office in 1972. Robert English after a record breaking 18 years in the Senate, Al Daloz a long time Representative retired this year. Russ Carey is to be our new Representative.

In 1972 the 6th grade at the Grammar School followed the 7th and 8th to Peterborough leaving only 1-5 in town. This has good features but it suggests that the control of education is becoming further from the people. Some ask: Is it changing from "Public education" to "Educator's education"?

Louie Hugron says that the big winter snows came on February 19th and March 15th and were 20 and 15 inches respectively. Ken/Ann Kepner comments that it's lucky snowwise that the extreme moisture came in May and June. Sally Hamilton says one year it seems as if the weather is getting warmer and dryer and then it gets wetter and colder.

Something of note usually happens at Town Meeting. Running over the 1972 articles the one providing for a new raft at the town beach at Norway Pond indicates our continuing interest in recreation for young and old. It supplements the improved baseball field near the old High School, now the Civic Center. It is in this spirit that John/Aino Kulish and others are working with the Harris Foundation Inc. to provide encouragement to the conservation of natural resources, nature walks, etc.

To get back to Town Meeting. Voting is always of special interest, of 688 registered 410 voted. Bill Rockhill was reelected Selectman, Joan Watson reelected to the Common Commission and Barbara Caverly reelected Treasurer — no surprises.

It was a surprise, however, that Meldrim Thomson defeated our neighbor Walter Peterson for Governor.

We like to mention wedding anniversaries. Chester/Ethel Dufraine were married 40 years ago by Reverend Weston. Their daughter and son-in-law Almon/Barbara Senechal arranged a suitable reception. If you want to talk about this or any town doings at the Post Office in the French language you can do so. Mary Hibberd who now works with Norm Phelps shares linguistic talents with former Postmaster Dorothy Clark. We are ready to welcome French visitors at any time.

Robert English

# VITAL STATISTICS

*Births Registered in the Town of Hancock, N.H., for the year ending December 31, 1972*

Date of Birth	Place of Birth	Name of Child	Sex	Name of Father	Maiden Name of Mother	Residence of Mother	Birthplace of Mother	Birthplace of Father
Dec. 8, 1971	Peterborough	Lisa Allison Knight	F	Charles Ernest Knight	Eva Harriet Brayton	Hancock	Massachusetts	New Hampshire

## REPORT OF THE FOREST FIRE WARDEN AND DISTRICT CHIEF

In New Hampshire, forest fire control is a cooperative State-town program. The Town Forest Fire Warden, appointed by the Director, Division of Resources Development upon recommendation of the Selectmen and the State's District Forest Fire Chief is responsible for fire suppression and other related duties. The State shares equally with the town in the cost of most forest fires, except illegal and careless fires, which are charged to the responsible party. The State further provides fire detection services, prevention programs, fire training for town wardens and crews, and back up equipment for fire suppression.

By authority of the State, the Town Forest Fire Warden controls all outside burning in his town except backyard cooking fires. Any person wishing to kindle a fire when the ground is not covered with snow must obtain a fire permit, free of cost, from the Town Forest Fire Warden. No permits will be issued for fires between 9:00 A.M. and 5:00 P.M. unless it is raining, except for commercial purposes.

Please be careful when using fire, remember it can be an extremely useful tool when under control but once allowed to run wild it can become a disastrous and devastating force. Only you can prevent a forest fire.

Number of fires reported and acres burned — 1972 season.

State	410 fires
District	79 fires
Town	None Reported

364 acres burned

48,334 acres burned

None Reported

Winthrop H. Hannaford

District Chief

Charles A. Gleason

Forest Fire Warden
